Portfolio | **GitHub** | **LinkedIn** | **Facebook**

SUMMARY:

I am mainly a frontend developer with a skillset of HTML, CSS, JS, Bootstrap, Tailwind, React, and some important tools like firebase, GitHub, Figma, ReactQuery, etc. Also, I am a MERN stack developer at the beginner stage with the backend skillset of Node.js, MongoDB, Express, and some tools such as JWT, CORS, etc.

SKILLS:

Expertise: • HTML5 • CSS3 • JavaScript (ES6) • Bootstrap • Tailwind • Responsiveness • React.js

Comfortable: • Node.js • Express • MongoDB • Authentication with JWT

Familiar: • Typescript • Material UI • Redux • Next.js

Tools: • Firebase • Payment gateway (Stripe) • Node mailer • Many useful npm packages

Extra skills: • MS Word • MS PowerPoint • MS Excel

PROJECTS:

DealX || client-side | server-side | live site

- A full stack SPA project using React, Tailwind, Node.js, MongoDB, Express, Firebase, JWT, and some necessary npm packages.
- It is a site about buying or selling old PC parts. Users can take actions or visit routes according to their role. Admin controls all buyers, sellers, and reported products. He can also verify any buyer.
- Sellers can sell or advertise their products and buyers can purchase them through the stripe payment gateway or report them.
- This site is completely responsive for any device. There is a standard user experience provided in this project.

Stay UpToDate || GitHub repo | live site

- It's a front-end project using pure HTML and JavaScript along with the Tailwind CSS framework.
- This is a news portal where people can see news of different categories. It loads different news for different categories that the user wants to read. It is fully responsive so, users can visit this site using any type of device.
- It doesn't reload the whole page for loading different news of different categories and it also shows a spinner while loading news which makes the UX better.

World Cup Stream || GitHub repo | live site
- It is a simple frontend project using pure HTML and utilizing the skill of vanilla CSS and its responsiveness.
- This is a streaming site for Cricket World Cup where people see live matches and find upcoming matches. As it is fully responsive, people can stream their lives on any type of device. (structure without functionality)
- Relevant animations are used where needed.

TECHNICAL COURSES:

Bangladesh Technical Education Board, Dhaka
Completed the 'National Skill Standard Basic Course' of 6 months, which ensures basic computer and office applications skills.

Complete Web Development Course, Programming Hero
Completed MERN stack web development course of 5 months which has made me skillful in web development.

COMMUNICATION:

I have achieved decent communication skills within the last 2 years.

- **Bangla native:** Bangla is my mother language and I am fluent in writing and speaking Bangla.
- **English:** I can write and speak decently in **English** which makes me confident in communicating with international people.
- **Hindi:** I can also communicate in **Hindi** which makes me eligible to connect with neighboring countries.

INTERESTS:

I love listening to music and also love to sing. Visiting and exploring different countries are my hobbies.
